

Future location of one of two video security camera poles donated by the East Lyme Public Trust Foundation, Inc.

## Progress Report: East Lyme's Overlook Park

Submitted by R.S. De Santo,  
East Lyme Public Trust Foundation, Inc.

Progress in construction of the new sea wall and Niantic Overlook walkway has reached a stage at which the finished product can be increasingly recognized.

Work remains on schedule and progress with reconstruction of the Overlook is expected to finish in 2013.

The photograph seen above was taken on May 10, 2011, at 2:33 pm and shows the passing Acela on its journey to Boston. The cylinders lying in the foreground of the photograph are reinforcement structures used in catenary foundations yet to be placed along the evolving new rail alignment next to the walkway.

One of two Video Security Camera Poles will be installed at the southeastern corner of this "#4 Overlook" projecting the walkway onto the park beach, as shown in the photograph.

The second pole at Overlook #1 will provide surveillance of the western portion of the walkway. From these vantage points, the new walkway will be under 24 hour surveillance and, will overlap Amtrak surveillance.

Stairs will lead down to the beach from the walkway at each of the four overlook projections, #2 of which will have a ramp that replaces its stairs.

Amtrak security will comply with national Homeland Security procedures to protect its railroad infrastructure 24 hours a day, 7 days a week making it both safe to ride the rails, and walk the Overlook Park and its new and enlarged beach areas. For more information see [www.publictrustfoundation.org/news.htm](http://www.publictrustfoundation.org/news.htm).
